and online at

<https://NTNU.zoom.us/j/94938585704?pwd=QzBnU3doTlhDVXRXM3Eza3dzNktHQT09>

The sister projects [Cultural-E](#), [syn.ikia](#) and [EXCESS](#) organise the workshop 'What is beyond energy efficiency? The overlooked values of Sustainable Plus Energy Buildings and Neighbourhoods' in the framework of the [EU Week of Regions and Cities](#).

This event aims to raise awareness of the multiple benefits of Sustainable Plus Energy buildings (PEBs) and Neighbourhoods (SPENs). Through a workshop session, the speakers will provide evidence of the importance of a multiple-benefit approach when it comes to design plus energy buildings and neighbourhoods. They will also collect policymakers' needs on this matter and discuss how to ensure a broad application of methodologies to quantify and monetise the above-mentioned benefits.

Registration link [here](#).

Agenda

11:00 – 11:10	Welcome message	Niki Gaitani (Norwegian University of Science and Technology)
11:10 – 11:25	Identifying and quantifying the value of multiple benefits of SPENs for decision makers	Sheikh Zuhaib (Building Performance Institute Europe)
11:25 – 11:35	Effective communication towards different stakeholders: using multiple benefits of PEBs as a trigger for energy efficiency	Wilmer Pasut (University Ca' Foscari of Venice)
11:35 – 11:45	From multiple benefits to effective policy making: Policy recommendations	Joaquin Villar (Andalusian Energy Agency)
11:45 – 12:30	Open discussion	Facilitators: Wilmer Pasut (University Ca' Foscari of Venice), Niki Gaitani (Norwegian University of Science and Technology), Andreas Tuerk (Joanneum Research)
12:30 – 12:40	Wrap-up and conclusions	All participants
